

FOR IMMEDIATE RELEASE

Sublime Solution Inc. Announces the Sublime Stimulus Plan to Encourage Organizations to Continue IT Spending During an Economic Slow Down

The Sublime Solution Stimulus Plan offers Pricing Incentives on a Wide Variety of Virtualization Solutions to Help IT Keep More “Green” in Their Pockets.

Manchester, NH., May 04, 2009 – Sublime Solution Inc. a global reseller specializing in virtualization solutions, today announced the Sublime Stimulus Plan, an incentive plan put in place to help organizations purchase virtualization technologies on a conservative budget. As a preferred partner of some of the top performing technologies in virtualization, Sublime Solution has the ability to extend an impressive cost savings to their customers. The Stimulus incentives will be available to customers taking advantage of the Sublime Solution online store or customers who are working with a Sales Consultant directly.

The plan will allot an additional 15% off any size purchase of an Acronis, Veeam, VKernel, or Replify solution. This promotion becomes effective today, May 4, 2009 through May 31, 2009 and is only extended through Sublime Solution, not at the vendor level. The Stimulus Plan is extended to any organization that is purchasing a product, or renewing maintenance from the named vendors during the promotion date via Sublime Solution web portal or sales consultant.

The solutions being highlighted in the Sublime Solution Stimulus Promotion are:

Acronis - is a leading commercial disk imaging and bare-metal restore solution for Windows and Linux servers. Acronis True Image Echo enables users to backup and restore both physical and virtual servers. It operates seamlessly with all Windows and Linux-based servers or desktops, whether they are physical or virtual and also supports major virtualization operating systems.

Replify - Reptor Accelerator Suite is a virtual appliance which means it is a 100% software solution for customers looking to accelerate WAN traffic between corporate computing resources. The Reptor Accelerator Suite is able to improve remote user experience through compression, XDR, protocol manipulation, and TCP optimization.

Veeam - Veeam Back-up 3.0 is a disaster recovery solution for VMware Infrastructure 3 that combines backup and replication in one product to protect companies from software or hardware failure. A true disaster recovery solution for VMware.

VKernel - The VKernel Virtual Appliance Suite for Systems Management is a set of "plug-and-play" virtual appliances designed to quickly address real world systems management challenges as organizations migrate to VMware virtual environments. VKernel products enable IT groups to immediately solve today's critical pain points by providing visibility into the capacity and resource consumption of each virtual machine.

About Sublime Solution Inc.

Headquartered in Londonderry, New Hampshire, Sublime Solution Inc. provides IT and data center managers with high quality and cost effective software solutions for their virtualization infrastructures.
