

FOR IMMEDIATE RELEASE

Sublime Solution Adds Local Resource Backup and Other Feature Enhancements To Sublime Online Backup Vault; an Online Backup Solution for Continuous Data Protection for Home and Business users.

Sublime Solution announces numerous solution enhancements to the Online Backup service ensuring to bring best of breed online backup technology to their business and home consumers.

Manchester, NH., November 17, 2009 – Sublime Solution Inc. a global reseller specializing in IT Solutions for small to medium businesses, today announced the enhancement release of Sublime Online Backup Vault. Users now have the capability to pick and choose data to be backed up to a local resource. This feature gives users the ability to more easily control backup costs by backing up to a mapped drive. Data is backed up in an encrypted and compressed format to the local resource. To ensure file changes are made while not connected to the local resource the files are cached until the resource becomes available. “In the advent of cloud computing business owners are faced with managing multiple backup solutions to accomplish both offsite and local restores. With Sublime Solution Online Backup Vault we give users an enterprise backup solution for both the cloud and local backup. Thus, offering our customers increased flexibility and lower costs.” says Jason Schuerhoff, VP of Sales.

Sublime Solution Online Backup Vault now boasts a new Backup Explorer interface, which allows users or administrators to restore files from either a local resource or data center, for multiple machines. Backing up multiple machines to a local resource or data center can persist across Internet connection interruptions.

Sublime Online Backup Vault is an affordable, multi-faceted approach to data security. Through Sublime Online Backup Vault your data is always protected against unpredictable hardware failure, theft, or natural disaster. With other features including: Multi-Factor Authentication, inactivity email notifications, back up of identically named machines under the same user, and more robust disk scans.

Affordability of the Sublime Online Backup Vault along with world-class technology makes this backup solution the choice of over 1000 businesses worldwide.
